Course Description
This course is designed to engage students in critically thinking about health policy making and its impact on healthcare program delivery and evaluation. This course will provide healthcare leaders with knowledge and skills in basic evaluation approaches and help them be consumers of evaluation in their roles as leaders. Program evaluation is a broad term that describes the process of collecting information to determine if a program or treatment is working as intended, whether it is being implemented with fidelity and what can be changed to make the program more effective. This course is designed to give students a broad overview of program evaluation and exposure to the variety of views and approaches to evaluation. Through understanding approaches to evaluating programs and reporting results, the students will be able to assess the intended and unintended outcomes of health policy decisions as well as the ethical and interpersonal context of evaluation.

Course Goals
By the end of the course, students should be able to:
1. Monitor and interpret trends and activities in health care and anticipate impact on health policy;
2. Understand and prepare key components of an evaluation plan, including logic models and literature reviews;
3. Demonstrate the steps in conducting a program evaluation;
4. Articulate the practical constraints in evaluation – budgets, time, data and political context – be able to formulate strategies to address them;
5. Build skills to be good consumers of evaluation, including identifying and using evaluation methods and results in an organizational context; and
6. Use evaluation results to understand the policy, ethical and political implications of health policy making.

Teaching Philosophy and Course Format
The role of the instructor is to guide the students through the process of acquiring the course subject matter. It is critical that students read the materials prior to each session and participate in class discussion. The course will be conducted as a combination of lectures and seminar (group discussions of readings). In addition there may be occasional guest lecturers.

Course Materials

There are assigned readings for each class that will be available on the Internet or will be provided electronically. Students will be expected to access CDC and Kellogg Foundation materials, particularly:

Students should also consider subscribing to an electronic health policy newsletter for the duration of the course: “Daily Health News” at http://www.kaiserhealthnews.org/Daily-Report.aspx. Other Internet sites to stay current with are:

- Academy Health: http://www.academyhealth.org/
- Kaiser Family Foundation: http://kff.org/
- Heritage Foundation: http://www.heritage.org/

Recommended additional materials for this course are:

**Course Grading**

Students are required to attend all classes. Students are also expected to complete all readings in preparation for class and participate in the class discussions. Grades will be determined by the following:

<table>
<thead>
<tr>
<th>Class Participation</th>
<th>Individual Activity</th>
<th>10%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Discussion Questions (4 submissions)</td>
<td>Individual Activity</td>
<td>20%</td>
</tr>
<tr>
<td>Policy Memorandum</td>
<td>Individual Activity</td>
<td>20%</td>
</tr>
<tr>
<td>Program Evaluation Activity</td>
<td>Individual Activity</td>
<td>10%</td>
</tr>
<tr>
<td>Evaluation Plan</td>
<td>Individual Activity</td>
<td>40%</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>100%</strong></td>
<td></td>
</tr>
</tbody>
</table>

**Course Assignments**

**Class Participation**

By definition, a seminar course involves a considerable amount of peer learning, and comparatively little lecture. I expect each student to participate actively in every class discussion. The people who learn the most from this class are the ones who:

- Come to class prepared with questions on each assigned reading;
- Offer relevant, insightful and thoughtful comments during class discussion;
- Contribute to the steady flow of comments or questions that advance group discussion during class meetings; and
- Listen attentively, respond respectfully and not talk or text while others are talking.

**Discussion Questions (20%)** Each student will need to write a response to four discussion questions over the course of the semester. These responses need to be posted by the start of the class session indicated on the course schedule. Your response should answer the question with appropriate support from course materials, relevant literature and/or experience. Tables and graphs may be included where appropriate; responses should not exceed 500 words. Two to three students who have responded will be asked to provide a 2-3 minute overview of their responses to facilitate class discussion.
Policy Memorandum (20%) (5 pages)

Identify a health care topic and prepare a 5-page policy analysis memorandum (single spaced, with two lines between paragraphs) using the following outline:

- Defining the issue and identifying stakeholders related to the issue
- Develop at least 2 alternatives, plus no change, to address the problem
- Address impact on cost, quality and access over the next 5 years that you anticipate for each option
- Anticipate likely reactions of the stakeholders to each alternative

Program Evaluation Activity (10%) (3 pages)

Find three examples of activities related to program evaluation from current local, state and federal news media. Describe the major issues, including any advocacy of new programs, or criticisms of current activities. Discuss how program evaluation could help inform the discussion.

Evaluation Plan (40%) (12-15 pages)

This is the major assignment for this class. You will choose a program/project and develop an evaluation plan. You will start by identifying a healthcare policy that will impact you, your community or your organization. It may be a program that you are currently working on or a program that you are familiar with. You will conduct a literature review on how programs have been developed to address similar policies. You will then recommend a program for your organization to address the policy and describe the Logic Model that could be used to illustrate the relationships between Inputs, Activities, Outputs and Outcomes (Initial, Intermediate, Long-term). You will present your evaluation plan during the last class session for critique by your colleagues.

Key elements of your plan are assigned as drafts throughout the semester, to allow you to receive guidance/feedback as you develop your plan. (Drafts will be graded only on timeliness, adherence to guidelines and level of effort). The final plan should be a 12-15 page paper (not counting bibliography and appendix), containing the following sections:

- Background (health care policy and implications)
- Literature review
- Program description
- Stakeholder identification
- Program logic model
- Evaluation goal statement
- Description of proposed methodology, including indicators to be used
- Analysis plan
- Description of how you plan to disseminate results
- Bibliography (at least 8 journal citations)
- Appendix containing any measurements tools to be used for data collection (survey, semi-structured interview guide, etc.)

The following sections will be submitted as drafts on dates indicated the course schedule. All drafts should be submitted as Word documents so that I can annotate or comment on them.
literature is of course the “gold standard” but not always feasible or even complete among the wealth of online and other information sources that are available.

| Program Description & Stakeholder Identification | This should be a substantive 2-3 page paper providing enough information in the following areas for the reader to fully understand the program/project you propose to evaluate. It should include:  
- Population/patients/community served  
- Program goals  
- Program setting  
- Stakeholders  
- Intervention design |

| Logic Model & Evaluation Goal | You will develop a logic model schematic that details the program’s resources, assumptions, intended activities, and the expected short, mid-term and long-term outcomes of these activities. This should be accompanied by a concise (no more than 2 paragraphs) summary of the specific goals of this evaluation. The reader should be able to understand exactly what information this evaluation will provide and how that information may be used. |

**Course Policies**

1. **It is required that everyone in class will:**
   - Attend all class meetings, read assigned materials, and be ready to discuss the materials.
   - Raise relevant questions and contribute relevant observations to the topic being discussed.
   - Demonstrate awareness of appropriate interpersonal communication and sensitivity to others.
   - Fully participate in group activities and discussions in class.
   - A laptop computer is allowed in class as long as it is used for classroom activities.
   - Cell phones should be turned off or the ringer set to “silent” or “vibrating-mode” in class.
   - Reasonable accommodations will be made for students with special needs. This syllabus is also available in alternative formats (please notify me in advance).

2. **The grade of “F” will be awarded in the case of academic dishonesty, such as plagiarism.** It may also be given in cases where the student demonstrates no effort/preparation and obvious lack of participation. In this latter case, such students will have fair warning they are on this track and given the opportunity to improve, before "F" is awarded. **This course is not designed to promote student failure; just the opposite, to promote student success.** Therefore, to do well in this course, the formula is simple and straightforward: read assigned materials, come to class and be ready to discuss assigned readings, and do well on assignments.

3. **Assignments are due on the dates specified on the schedule.** Missed assignments will receive a score of zero.

4. **Cell phones, electronic media:** Cell phones and all other communication devices must be switched to ‘silent’ mode during class meetings. Use of laptops for activities not related to this class will be penalized.

5. **Student Feedback:** I encourage you to take an active role in this course by providing me with your feedback and comments about the course throughout the semester. Please do so by contacting me directly – individually, collectively or via delegates – as early as possible rather than waiting for a formal feedback survey. Feedback is an important part of continuous improvement. Please let me know if there is anything I can do to make this class better for you.
6. Grading Scale
The grading scale below indicates the ranges for specific letter grades. The numeric scores you receive for assignments will be weighted based on the percentages in the course outline. The final score will then be used to assign a course grade.

<table>
<thead>
<tr>
<th>Letter</th>
<th>Number (%)</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>93.00-100.00</td>
<td>Excellent, superior performance, showing comprehensive understanding of subject matter</td>
</tr>
<tr>
<td>A-</td>
<td>90.00-92.99</td>
<td>Good, clearly above-average performance with knowledge of subject matter generally complete</td>
</tr>
<tr>
<td>B+</td>
<td>87.00-89.99</td>
<td>Satisfactory, basic understanding of the subject matter</td>
</tr>
<tr>
<td>B</td>
<td>83.00-86.99</td>
<td>Minimal pass, marginal performance generally insufficient preparation for subsequent courses in the same subject</td>
</tr>
<tr>
<td>C-</td>
<td>70.00-72.99</td>
<td>Fail, unsatisfactory performance or failure to meet course requirements</td>
</tr>
</tbody>
</table>

This schedule is a guide and every attempt is made to provide an accurate overview of the course plan. However, circumstances and events may make it necessary for the instructor to modify the schedule during the semester and this may depend, in part, on the progress, needs, and experiences of the students. In addition, opportunities to bring in guest speakers or attend topical events, university closures, and other unforeseen events may result in changes to the schedule. The most up-to-date schedule will be provided at the start of the semester.
