

**Program Evaluation**

PADM 597, Spring 2020

Shuyang Peng, PhD

Email: speng@unm.edu

Office Location: SSCO 3012

Office Phone: (505) 750-4768

Office Hours: Mondays 1:00 – 2:00 pm (virtual office hour)

Mondays 2:00 – 3:00 pm (in-office)

or by appointment

Class Meeting Day(s): Tuesdays 4:00-6:30pm

Class Location / Room: SSCO 3030

---

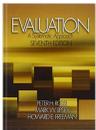

**Course Description and Objectives**

Program evaluation is essential for designing and operating effective programs in public and nonprofit organizations. It systematically uses scientific methods to obtain empirical information that can assist managers to assess and improve their programs. The course contains topics such as needs assessment, program theory, program outcome measurement, data collection, program impact evaluation, and evaluation result reporting.

Upon successful completion of this course, students should:

- 1) Become familiar with the concepts, theories, and methods of evaluation research;
- 2) Describe the purposes and logic of program evaluation;
- 3) Raise concrete evaluation questions;
- 4) Apply principles of research design to evaluation questions;
- 5) Propose an appropriate evaluation plan to assess the implementation and effectiveness of a program;
- 6) Use evaluation results to anticipate or improve program performance.

**Required Textbook and Readings**

Rossi, Peter H., Mark W. Lipsey, and Howard E. Freeman. (2004). Evaluation: A Systematic Approach, 7th Ed., Thousand Oaks, CA: Sage Publication. ISBN-13: 978-0761908944; ISBN-10: 9780761908944

Newcomer, Kathryn E, Harry Hatry, and Joseph S. Wholey. (2015). The Handbook of Practical Program Evaluation, 4th Ed., Jossey-Bass. This book can be accessed via UNM E-library at <https://ebookcentral.proquest.com/lib/unm/detail.action?docID=2144898#> Please note that the

number of simultaneous access to the book is limited.

All other readings are posted on UNM Learn. Make sure you check the Learn regularly.

### Quizzes, Assignments, and Final Project

#### Weekly Reading Quizzes

A weekly reading quiz will be given at the beginning of each class throughout the semester starting from session 2. Each reading quiz contains five multiple-choice questions. You only need to answer four questions correctly to get the full score. There are 10 quizzes in total and no quizzes will be given in Session 9&11. No make-up quiz will be provided.

All students will take the quizzes on UNM learn. **All ABQ students should bring a laptop/iPad to the class to take the quizzes online.**

#### Assignment 1: Logic Model

You will prepare a logic model for a program of interest. A detailed explanation of the assignment and requirements is posted on UNM Learn under Assignment.

#### Assignment 2: Outcome Measurement

You will identify an outcome of a program that interests you. Use google scholar to identify 1-2 articles that have measured this outcome, cite these two articles using APA style. You need to 1) describe the outcome you are studying and its definition; 2) describe how the studies you identified measure the outcome; 3) describe how valid you think the measures are, and why; 4) describe how reliable you think the measures are, and why? Post your answer (250-350 words) on the discussion board.

#### Assignment 3: Critique of Impact Evaluation Study

You will select an **IMPACT EVALUATION** study and prepare a written critical review on it. A detailed explanation of the assignment and requirements is posted on the UNM Learn under Assignment.

#### **Assignment 4: Interview Protocol**

In Session 11, you will have an opportunity to conduct an interview with one of your classmates in class. The purpose of this exercise is for you to gain first-hand experience of conducting an interview. In order to do that, you need to create an interview protocol for a 20- minute interview on a topic of your choosing. A detailed explanation of the assignment and requirements is posted on UNM Learn under Assignment.

#### **Assignment 5: Final Project**

You are required to form a group with a maximum of 3 students in the group. The group needs to identify a real Request for Proposals (RFP) from a federal, state, or local government agency, a foundation, nonprofit organization, or international organization, which ***calls for an evaluation of a program, project, or demonstration***. The group needs to propose an evaluation design based on the requirement of the RFP. It is encouraged that the group will identify a RFP that matches well with their interests; if not, a list of RFPs is available on UNM Learn. A detailed explanation of the final project and requirements is posted on UNM Learn.

The final project is composed of three parts:

1. **A One-Page Proposal:** you need to submit the identified RFP plus a one-page proposal that 1) describes the purpose of the RFP and 2) briefly introduce your preliminary plan of the evaluation design.
2. **Presentation Slides:** You need to prepare Power-Point slides for the presentation, which should last 12 to 15 minutes (depending on how many students are enrolled in our class). There will be a 3-5 minutes Q&A session after each presentation. The presentation will be graded on both the quality of the content and of the presentation delivery.
3. **Final Paper:** The final paper should be 18-20 pages (excluding references and appendix) in length (double-spaced, Times New Roman, 12-point font).

#### **Missing Assignments, Grade Reduction Schedule, and Assignment Revision**

The assignment due dates are marked in the syllabus. If your assignment is not submitted on time, I will deduct 5% per day (e.g. the maximum grade you could possibly receive after a one-day late submission would be 95 out of 100, after 2 days 90, after 3 days 85, and so on). For in-class submission, if an assignment is submitted on the due date after class, 5% will be deducted. For online submission, if an assignment is submitted after the due time, 5% will be deducted. I will grade any work submitted after **7-day** delay with a **ZERO** (the same grade I would give if you did not submit your work). Be aware that a zero mark in one of the assignment may **seriously hinder** your chances of passing the course.

You have one opportunity to revise the assignment for improvement after receiving the first grade. In order to be considered, the revision 1) must be submitted to me within a week of receiving the first grade; 2) must use a different color of font to show the revised part; 3) must have the grading rubric from the first submission attached to the assignment. The revision does not guarantee grade improvement and the grade for the revision will not exceed 85.

## Grading

Quizzes	1x10=10%
In-Class Participation	10%
Attendance	10%
Logic Model Assignment	15%
Out Measurement Assignment	5%
Evaluation Report Critique	15%
Interview Protocol	5%
Final Project	20%
Final Project Presentation	10%
Total	100%

All quizzes and assignments are graded on a 100-point scale. The final grade point is a weighted total of the grades for all course work.

## Class Policies

**Class Participation and Discussion.** All students are expected to attend class regularly, complete assigned readings before class and actively participate in classroom discussion. I am, however, well aware of the potential negative effect of external factors on your learning or the possibility that you may be facing a tough time or an illness. I will require written proof from your supervisor or your physician for an accommodation. Any other absences will result in a 2-point penalty per absence off the total grade.

**Laptops, Tablets, and Cell Phones Use.** These technology devices CANNOT be used during the class unless otherwise approved! A recent study conducted by MIT scholars found that the use of computer has a significant negative impact on student performance in class <http://seii.mit.edu/wp-content/uploads/2016/05/SEII-Discussion-Paper-2016.02-Payne-Carter-Greenberg-and-Walker-2.pdf>.

Please turn off cell phones and other communication and entertainment devices prior to the beginning of class. Notify me in advance if you are monitoring an emergency, for which cell phone ringers should be switched to vibrate.

**Accommodation Statement.** In accordance with University Policy 2310 and the Americans with Disabilities Act (ADA), academic accommodations may be made for any student who notifies the

instructor of the need for an accommodation. It is imperative that you take the initiative to bring such needs to the instructor's attention, as I am not legally permitted to inquire. Students who may require assistance in emergency evacuations should contact the instructor as to the most appropriate procedures to follow. Contact Accessibility Resource Center at 277-3506 for additional information.

If you need an accommodation based on how course requirement interact with the impact of a disability, you should contact me to arrange an appointment as soon as possible. At the appointment we can discuss the course format and requirements, anticipate the need for adjustments and explore potential accommodations. I rely on the Disability Services Office for assistance in developing strategies and verifying accommodation needs. If you have not previously contacted them I encourage you to do so.

**APA Citation Style.** Assignments and final research proposal should strictly follow APA citation style. The following websites provide basic guidelines:

<http://owl.english.purdue.edu/owl/resource/560/01/>

<http://www.lcc.edu/library/help/citation/apaonline.aspx>

**Academic Integrity.** The University of New Mexico believes that academic honesty is a foundation principle for personal and academic development. All University policies regarding academic honesty apply to this course. Academic dishonesty includes, but is not limited to, cheating or copying, plagiarism (claiming credit for the words or works of another from any type of source such as print, Internet or electronic database, or failing to cite the source, fabricating information or citations, facilitating acts of academic dishonesty by others, having unauthorized possession of examinations, submitting work of another person or work previously used without informing the instructor, or tampering with the academic work of other students. The University's full statement on academic honesty and the consequences for failure to comply is available in the college catalog and in the *Pathfinder*.

**Library and Tutorial Services.** UNM-Main campus provides many library services and some tutorial services for distance students. For library services, go to <http://www.unm.edu/libraries/> to link to a specific library or to contact a librarian. For tutorial services, go to <http://caps.unm.edu/online> to explore UNM's online services.

In an effort to meet obligations under **Title IX**, UNM faculty, Teaching Assistants, and Graduate Assistants are considered "responsible employees" by the Department of Education (see pg 15 - <http://www2.ed.gov/about/offices/list/ocr/docs/qa-201404-title-ix.pdf>). This designation requires that any report of gender discrimination which includes sexual harassment, sexual misconduct and sexual violence made to a faculty member, TA, or GA must be reported to the Title IX Coordinator at the Office of Equal Opportunity ([oeo.unm.edu](http://oeo.unm.edu)). For more information on the campus policy regarding sexual misconduct, see: <https://policy.unm.edu/university-policies/2000/2740.html>
